Mr. E. J. Reslock, Maintenance Engineer
The Dow Chemical Company
P. O. Box 500
Gardena, California

Dear Sir:

Receipt is acknowledged of your communication regarding the status of the sanitary sewer in Vermont Ave. and James St. constructed in 1942 under Private Contract No. 197 for the benefit of the Synthetic Robber program.

A thorough search of the Sanitation Districts' file does not reveal any document which would convey the ownership of the sewer line to the District. Therefore, the Sanitation District does not claim nor maintain the said sewer line. However, upon presentation of a proper dedication and acceptance by the District's Board of Directors, ownership and maintenance of the sewer line may be assumed by the County Sanitation District No. 8 of Los Angeles County.

Yours truly,

A M Rawn
Chief Engineer and
General Manager
